

Epygi iQall Mobile Application: Increase Productivity, Reduce Costs

The iQall mobile application allows the user to make calls from his/her smartphone via Epygi IP PBXs, both premised and cloud-based. After installing iQall on your smartphone and configuring it with IP PBX, you can easily dial the desired number. It uses the IP PBX to establish calls between your smartphone and the dialed numbers anywhere in the world. The IP PBX will place an initial call to your smartphone before connecting to the dialed number, therefore the call to your smartphone will be free if you have a mobile service plan with free inbound calls. Also, since the connection to the dialed number is established by the IP PBX, you don't need to pay for that connection on your smartphone, even for long-distance and international calls. This way your company's mobile phone calling cost will decrease significantly.

Licensable Features - In a Bundle, Under One iQall Advanced Features License Key*

iQall Mobile Toggling

You can toggle the active call between your desk phone and smartphone. It enables you to alternate the call from your smartphone running iQall to your desk phone without the call being dropped. This will allow you to seamlessly enter or leave the office without the person on the other end of the phone even noticing the change.

Voice Mail Notifications/Mailbox Checking

This feature will send new voice mail notifications to the iQall application installed on your smartphone, thus informing you that a voicemail is received in the mailbox for the iQall associated extension on the QX IP PBX. You can then easily access the mailbox of the iQall extension on IP PBX.

Missed Calls Notifications

You will get missed call notifications to the iQall application installed on your smartphone informing you of the missed calls to the iQall extension on the IP PBX.

Benefits You'll Get:

- Make free local or international calls on your smartphone.
- Call anyone via your smartphone's iQall application rather than using your mobile plan.
- With the iQall mobile toggling leave or enter the office unnoticed, while talking on the phone.
- Never miss an important call, get notified when someone tried contacting you on your office extension.
- Stay in the loop, get a notification on your smartphone, when a voicemail is received on your office extension.
- Lower your mobile phone bill.

* The iQall Advanced Features License Key will only be available for Epygi QX IP PBXs, both premise and cloud-based.
